

HYOSCYAMINE SL/ODT (LEVSIN) TABLET

This medication is used to reduce or help prevent tracheal (throat) congestion. You will be giving these tablets under the tongue, and they will absorb through the oral tissues (mouth).

The tablet should be placed under the tongue and allowed to dissolve. You may use an oral sponge to moisten the mouth prior to giving this medication. Hyoscyamine is usually given every six hours as needed to control tracheal congestion (according to the doctor's orders).

If you have any questions relating to this, or any medication, please do not hesitate to call us; day or night at 262-652-4400
